ABOUT PARANOIA & BELIEFS GROUPS

Since their inception in the late 80s, Hearing Voices Groups have become internationally established as a valuable source of support for people who have unusual sensory perceptions (e.g. voices & visions). Groups provide a safe space for people to share experiences and to find ways of living with them successfully.

For those who don't identify as voice-hearers, Paranoia & Beliefs Groups can provide a similar kind of support. But the emphasis instead is on exploring and sharing different realities and beliefs.

There are currently 18 Paranoia & Beliefs peer support groups in London and 29 Hearing Voices Groups. Additionally, some groups embrace both voices and beliefs within the one group.
